MODERN STORE FRONTS

IF YOU are having plans prepared for a store front for a new building, or for remodeling an old one, you of course will want to set the glass in the construction that will give the best satisfaction, so have the specifications call for

"The Coulson Patent Store Front Construction"

which is the only practical one of its kind on the market.

Illustrations of store fronts in which it has been used will be found on page eleven and page eighteen of this booklet.

Write for catalogue "E-8" which thoroughly describes it and also for pamphlet of the "COULSON DRAINAGE SILL".

J-M ASBESTOS ROOFING

Made of indestructible Asbestos (Rock) fibre and Trinidad Lake Asphalt, the great weather-proofer, J-M Asbestos Ready Roofing is literally a pliable stone. Fire, acids, gases, chemical fumes, heat or cold have no effect upon it. It is therefore practically indestructible.

And because of its stone nature, J-M Asbestos Roofing never needs painting or graveling. Its first cost is its only cost. Asbestos being a non-conductor of heat and cold, this roofing keeps a building warm in winter and cool in summer.

J-M Asbestos roofing is adapted for any building anywhere.

Most hardware and lumber dealers sell J-M Asbestos roofing.

Write for Samples and Catalogue 303.

Keystone Hair Insulator

KEEPS THE COLD OUT—THE HEAT IN

Its millions of dead air cells—more than any other insulation contains - makes KEYSTONE unequaled for preventing the transmission of heat, cold or sound through the walls, floors or roof of a building. The outer cold cannot enter — the heat from within cannot escape. Full benefit of all the coal burned is secured. It makes every room comfortable, healthful and habitable.

Keystone is composed of cleansed and sterilized cattle hair securely fastened between two sheets of strong, non-porous building paper. Will not carry flame, as fire instantly shrivels it. Will not dry out, rot or attract moisture, and is positively odorless and verminproof.

A postal brings Samples and Catalogue.

The MOLINE SYSTEM

OF VACUUM-VAPOR HEATING

BETTER THAN HOT-WATER BECAUSE

They cost less. **They require 40 per cent less radiation,** saving money and floor space. They heat quicker. The radiators remain hot after pressure drops. The temperature of the radiators can be regulated to bring the temperature desired in the rooms. The boiler require no more attention than hot water boilers. Where a hot water boiler is under 15 to 25 pounds pressure a Moline System boiler contains no more pressure than a tea kettle.

MOLINE AIR TRAP AND VACUUM-VALVE

Only one air vent on the system and that is in the basement.

No air vents in the rooms to destroy rugs, floors, ceilings and furniture.

ABSOLUTELY NOISELESS

MOLINE VACUUM-VAPOR HEATING CO.

Moline, Illinois

ANNOUNCEMENT

IN PRESENTING this album of attractive homes and modern business houses, the author is cognizant of the fact that he is placing the handiwork of his profession in comparison with other architects, local and foreign. Therefore he invites the very closest inspection of the public, whether prospective builders of homes, business houses, or other structures.

Some of North Carolina's most attractive homes, in and adjacent to Greensboro, are herein shown.

If the reader is a prospective builder, or is interested in any kind of structural work, correspondence is invited and the author will be pleased to furnish any information desired.

In compiling data for this work the utmost care has been taken in securing cards from material men and contractors, so that none but the best and most reliable are herein represented, and in turning the pages of this album, we invite you to read carefully the business announcements.
